(1) International Power has a 75% interest in a 30MW wind farm (27MW operating, 3MW under construction) located in southern Italy.

(2) Eggborough is accounted for as available-for-sale investment.

(3) In addition to the above holding, in June 2007, International Power also acquired the rights to additional returns from Paiton equivalent to a further 9.2% of earnings and cash distributions.

(4) District cooling system capacity.

Note: Gross MWs are defined as maximum electrical output that can be produced at reference site conditions.
